PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 6+ years of experience building scalable, business-focused web applications using React.js, Node.js, Express.js, and MongoDB. Currently a Consultant - Software Developer at Atos, resolving production incidents and defects through root cause analysis. Experienced in building responsive user interfaces, designing and integrating REST APIs, optimizing application performance, and mentoring junior developers. Previously delivered robust, maintainable solutions at Deloitte USI and Walmart (via TEKsystems).

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML, CSS

Frontend: React.js, Next.js, Redux Toolkit, React Router, Material UI (MUI), Prime React, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Django, RESTful APIs, JWT Authentication, Firebase Phone OTP

Databases: MongoDB, Mongoose, PostgreSQL, MySQL

DevOps and Cloud: Azure, Docker, Kubernetes, Jenkins, CI/CD, Elasticsearch, Snap Logic, MuleSoft

Tools: Git, GitHub, Bitbucket, Postman, Kibana, New Relic, Visual Studio Code, Microsoft Bot Framework

Spoken Languages: English, Hindi, Bengali

Practices: Root Cause Analysis (RCA), Incident and Defect Resolution, Performance Optimization, Load Testing, Code Refactoring, Accessibility (ADA)

WORK EXPERIENCE

Consultant - Software Developer | Atos | Jan 2026 - Present

- Develop and enhance front-end applications using React.js, JavaScript, and modern UI development practices.
- Build and maintain backend services and RESTful APIs using Node.js and Express.js.
- Perform database operations and data management using MongoDB.
- Analyze, troubleshoot, and resolve application incidents, defects, and production-related issues.
- Perform root cause analysis and implement permanent fixes to improve application stability.
- Integrate frontend components with backend APIs to deliver seamless application functionality.
- Optimize existing codebases, enhance application performance, and improve code maintainability.
- Collaborate with cross-functional teams to understand requirements and deliver business-focused technical solutions.

Tech Stack: React.js, Node.js, JavaScript, Express.js, MongoDB, REST APIs, Git, Postman

Software Developer | Walmart (Contract via TekSystems) | Apr 2025 - Dec 2025

- Developed backend modules in Node.js, focusing on database operations and seamless API integrations for business processes.
- Refactored core codebases to improve maintainability and scalability, reducing future technical debt.
- Built advanced frontend features in React.js to enhance usability for business stakeholders.
- Managed deployments and ensured reliable, efficient application releases using CI/CD pipelines.
- Led the integration of business-critical APIs with the frontend, resulting in a smoother user experience.

Tech Stack: ReactJS, NodeJS, PostgreSQL, MySQL, MUI, JavaScript, Express JS, APIs, CI/CD

Software Engineer | Deloitte USI | 2020 - Apr 2025

- Architected scalable solutions in Node.js and React.js, optimizing system performance and code quality across multiple projects.
- Designed responsive UIs and interactive components that met ADA accessibility standards and improved user experience.
- Mentored junior developers, facilitating their skill ramp-up and independent contribution to project goals.
- Pioneered the integration of chatbots for MS Teams using the Bot Framework, enabling efficient business communications.
- Conducted load testing and performance optimization for critical systems, increasing reliability under scale.
- Led migration of React screens to modern frameworks, focusing on reusable components and maintainable codebases.
- Resolved 10+ vulnerabilities across 6 applications within two weeks, improving security posture.
- Migrated mission-critical applications to Kubernetes and the cloud, achieving zero downtime.

Tech Stack: ReactJS, NodeJS, PostgreSQL, MySQL, PrimeReact, JavaScript, Tailwind, Bootstrap, ExpressJS, APIs, Kubernetes, CI/CD

PROJECTS

Production-Ready Vehicle Management Website | Self Work | Mar 2026 - May 2026

Live Site: https://my-park-tag.vercel.app/

Designed and developed a vehicle QR tagging platform that lets owners register vehicles and create printable QR tags. When a tag is scanned, visitors can verify their phone and submit a contact request without exposing the phone number of the owner on the public scan page. Built owner and admin dashboards for vehicle and QR management, scan history, account settings, subscriptions, and sticker orders. Implemented authentication, backend APIs, payment integration, and real-time notification workflows.

- Developed responsive user interfaces and dashboards using React, React Router, Redux Toolkit, and Material UI.
- Built REST APIs and backend services using Node.js and Express.js.
- Designed MongoDB schemas and data access using Mongoose for users, vehicles, scan logs, subscriptions, and sticker orders.
- Integrated Firebase phone OTP, email OTP, JWT authentication, and request validation.
- Implemented QR code generation, vehicle management, and scan logging.

Tech Stack: React, React Router, Redux Toolkit, Material UI, Node.js, Express.js, MongoDB, Mongoose, Firebase, JWT, REST APIs

Dice Game | Self Work | May 2020 - Jul 2020

Live Site: https://dicegame-dips.vercel.app/

Source Code: https://github.com/DipenduDey/HTML-CSS-and-JavaScript.git

Built a dice game as a self-interest project using HTML, CSS, and JavaScript.

Tech Stack: HTML, CSS, JavaScript

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

West Bengal University of Technology, Durgapur, West Bengal | 2015 - 2019
